

4 Week Training Plan

WALKING STARS

Shine brighter for cancer research and relief

WEEKS
4-1

YOUR WEEK

Start & finish all your walks with a 10 minute stroll to warm up & cool down.

Sunday: Recovery walk! Aim for a moderate pace.

Mondays & Wednesdays: Choose a low impact activity such as swimming, cycling, pilates or yoga.... Or choose this to be your rest day!

Tuesday: A little tougher than Sundays walk, aim for a pace that makes talking slightly challenging.

Thursday: This should be a hard walk, add short bursts of speed, walk your fastest for a short distance. Do this several times during your work out. Interval work outs will be the one thing that really make a difference to your speed.

Friday: Recovery walk!

Saturday: This is your endurance walk, and distance, not speed will be the key to your half marathon preparation. Walk your endurance walk at a moderate pace.
